

GET THE BEST FROM MEDALLION TL CONTACT+ PROTECTION

BIO-INSPIRED - developed from naturally occurring antifungal compounds in soil bacteria

STEP ONE: ACTIVE IN THATCH

Removes inoculum and source of disease

Slow uptake from the thatch allows use from the start of November through to March

NOVEL MODE OF ACTION

Helps resistance management

STEP TWO: CONTACT+

Activity works on the leaf, in the thatch and at the soil surface to protect the turf and reduce pathogen populations in the soil.

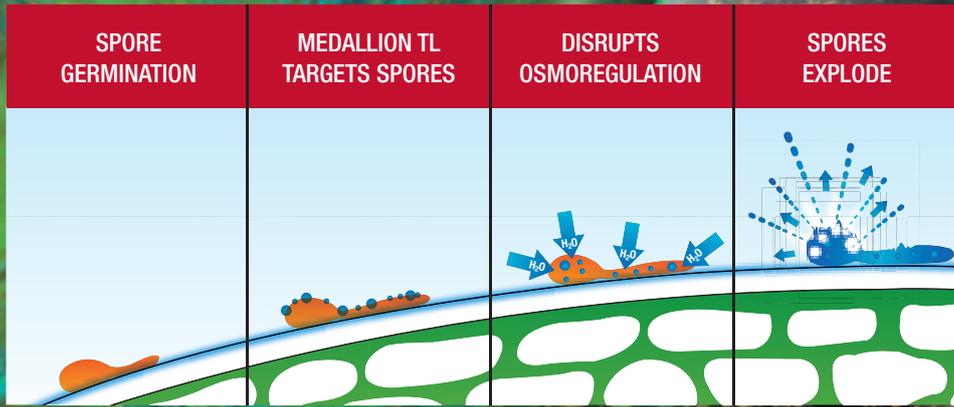

LOCKS ONTO LEAF WAX

Rain fast for long lasting protection

GRADUAL UPTAKE BY ROOTS

Protects new growth in cool conditions allowing use from the start of November through to March.

NOVEL MODE OF ACTION

The activity of fludioxonil in targeting pathogens is effective on the leaf, in the thatch and among organic matter in the soil.

Core Recommendations

Effective against:

- Microdochium Patch
- Leaf Spot
- Anthracnose

Application rate

3.0 l/ha
Maximum four applications per year

Area of use

Can be used on all managed turf and amenity grassland, including all areas of the golf course and other sports turf

Water volume

125–500 l/ha

Application technique

All types of spray equipment

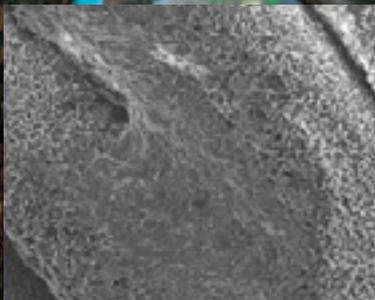

LERAP

B. Category B products are subject to 5m buffer zones when used with ground crop sprayers or 1m when used with hand-held sprayers. The width of buffer zones for these products may be reduced by applying a LERAP.

Packaging

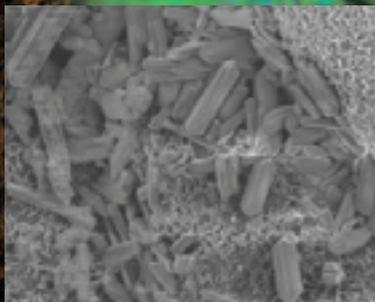

3 litre S-pac

LOCKS ON TO LEAF WAX

Medallion TL

Locks onto the leaf wax

Iprodione

Larger crystals bind less tightly to leaf

GRADUAL UPTAKE & ACTIVE IN THATCH

+ Target disease pathogens on the plant and in the thatch

+ Uptake from roots and gradual movement into new growth
