**TURF SOIL PESTS**

**Acelepryn®**  
Insecticide

syngenta®

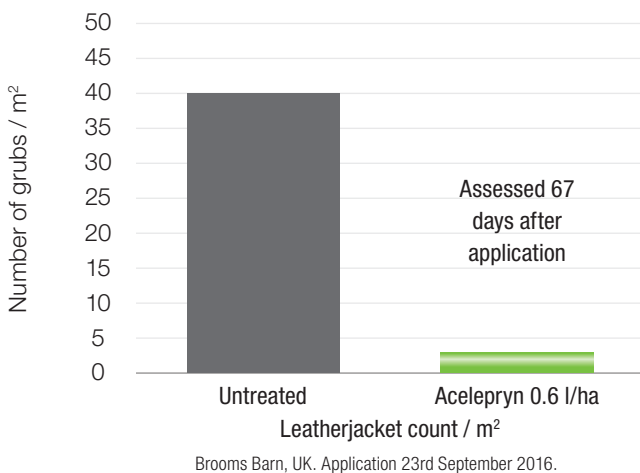

## Product

- **Formulation type:** Liquid (SC)
- **Technology:** Insecticide
- **Pack size:** 0.6 litre and 3.0 litre
- **Active ingredient:** chlorantraniliprole 200 g/L

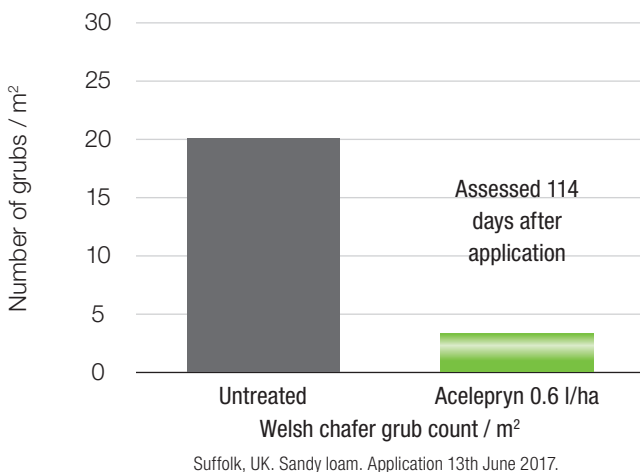

## Label approved pests

- Chafer grubs
- Leatherjackets

### Control of leatherjackets (*Tipula paludosa*)

### Control of Welsh chafer (*Hoplia philanthus*)

## Application information

- **Chafer grubs:** Apply once peak flight has been observed (typically June).
- **Leatherjackets:** Adult crane fly activity may not peak until mid-October. Always check peak flight has occurred for application timing.
- **Sites with historic high pressure have increased probability of re-infestation.**
- **Application rate:** 0.6 l/ha
- **Water volume:** 500-600 l/ha
- **Number of treatments:** 1 per year

## Areas of use

Golf greens, tees, fairways and roughs, sports pitches, racecourses and gallops, bowling greens, airfields, and professional application to commercial and residential lawns, subject to specific restrictions on the % of the area being treated - see label for details.
