

DATA AT YOUR FINGERTIPS TO MAKE MORE INFORMED TURF MANAGEMENT DECISIONS

# DOLLAR SPOT DASHBOARD

**DOLLAR SPOT OUTBREAKS INCREASINGLY RESULT IN SERIOUS SURFACE QUALITY LOSS ON GREENS, APPROACHES AND TEES. CHANGING CLIMATIC CONDITIONS AND ITM PRACTICES ARE DRIVING THE SEVERITY OF ATTACKS. TURF ADVISOR GIVES YOU THE DATA TO DECIDE CONTROL STRATEGIES.**

## TURF ADVISOR TOOLS

Pick the appropriate Turf Advisor tools for your dashboard and prioritise their order, to better understand dollar spot risks and when to act.

### HUMIDITY & LEAF WETNESS

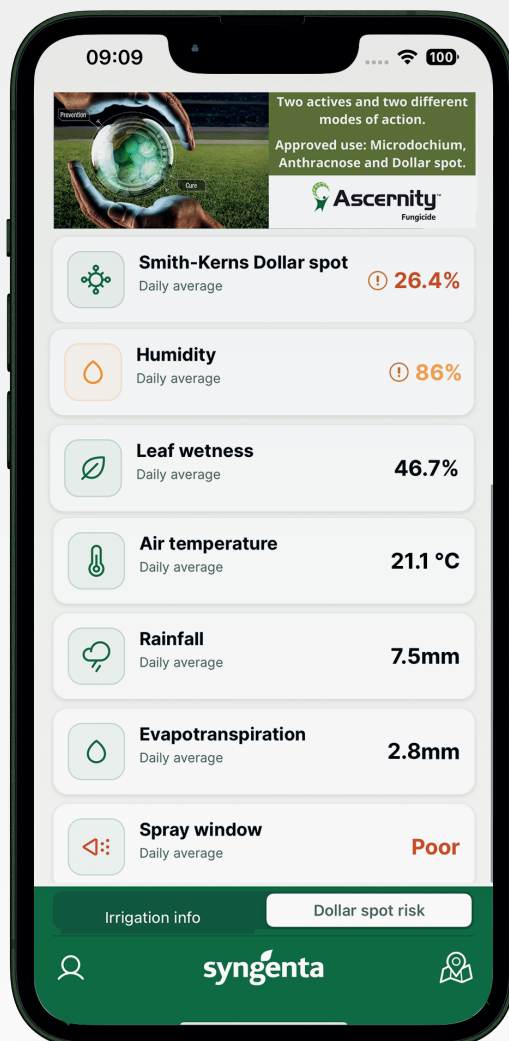

Dollar spot thrives in humid conditions and leaf wetness – with dry roots. Turf Advisor provides weather data sets to alert high risk periods, in time to take action before disease breaks out.

### RAINFALL

Keep track of recent rainfall and accurate forecasts for the coming days. Instant view of average data for the past two weeks, and historic 10-year records for your current two-week period.

### EVAPOTRANSPIRATION

Dry soils are associated with more severe outbreaks of dollar spot, particularly where turf is under greater stress. Turf Advisor forecasts of evapotranspiration can help manage and mitigate any deficits earlier and more effectively.

### SMITH-KERNS MODEL

Recognised as the most accurate available model for dollar spot risks, Turf Advisor indicates pressure over the past week and for the coming days – to help you assess risk. Also gives a two-week average and a historical risk to aid better decision making.

### AIR TEMPERATURE

Temperature is one of the main drivers of dollar spot infection. Although it is built into the Smith-Kerns model, the actual data helps quantify risk pressures.

### SPRAY WINDOW

Application timing is crucial to apply preventative fungicide strategies for dollar spot. Turf Advisor gives an accurate picture of available spraying opportunities for all applications.

## DOWNLOAD NOW

**Syngenta Turf Advisor gives greenkeepers, turf managers and agronomists instant access to a wealth of key information and advice to help make better decisions for day-to-day actions and planning.**

Fully customisable for any location and situation, the Turf Advisor app provides essential weather data and turf management models, presented in a clear dashboard that can be tailored and adapted through the season to focus on imminent issues and challenges faced.
